

JEDI MENTORING PROGRAM

with Rachel Blackman

A year long mentoring program to support you to make what you want from a sense of purpose and creative agency.

The year is about listening to the rhythms of the planet and the intrinsic laws of how creation

happens in nature, to help us grow what we want to create and how from a place of enjoyment.

You will learn self mentoring tools and how to be your own wise council. You will also learn to lean into the resources

of the group and the become more intuitive with the wise council of the planet.

If this doesn't suit you, because of the limitations of geography or finance, this year I am also offering a solo only track that

doesn't interact with the group. One lighter. One much deeper. Both with the option of adding body work to supplement the learning.

Dates, pricing information and application info for 2020 below.
